The Ultimate Seal®

The Airtight Clamp-Connect System

US Tubing, our airtight Clamp-Connect system is a modular, laser welded, clamp-and-gasket joining system that is guaranteed to be leak-free. Each component terminates in a turned out lip on each end. A u-shaped gasket fits over one lip at each joint and then the connection is completed using an adjustable clamp. When the clamp is tightened, it compresses the gasket between the pipe edges to form an airtight seal.

The components (pipe, branches, elbows, etc.) are standard 16 gauge metal with a range of 22 to 16 gauge available upon request. The pipe comes in standard 59" lengths which can be easily clamp-connected together to produce long runs. An adjustable sleeve pipe allows for infinite adjustments in the field.

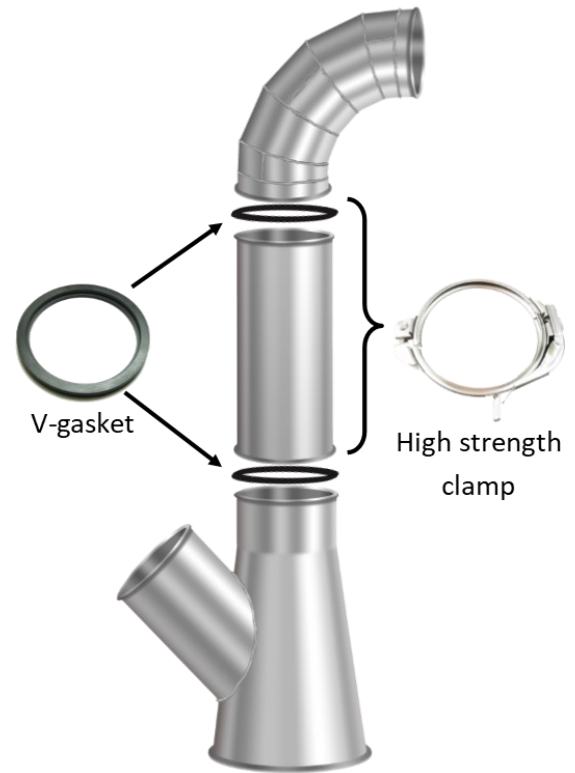

And they all ship from our North Carolina factory in days, not weeks. The system is available in galvanized, stainless or painted steel and we offer a variety of finishes and coatings.

US Tubing is suitable for any application where bolted flanges are typically used to eliminate leakage or contamination, including:

- Air Knives
- Blowers
- Cleanroom HVAC
- Combustion Air Systems
- Commercial Dishwashers
- Coolant Mist Extractors
- Dust Collectors
- Gravity Spouting
- Industrial Dryers
- Industrial Vacuums
- Laboratory Exhaust
- Parts Washers
- Pneumatic Conveying Solutions
