The Ultimate Seal®

## Lab Ducting

### US Tubing For Laboratory Fume Exhaust

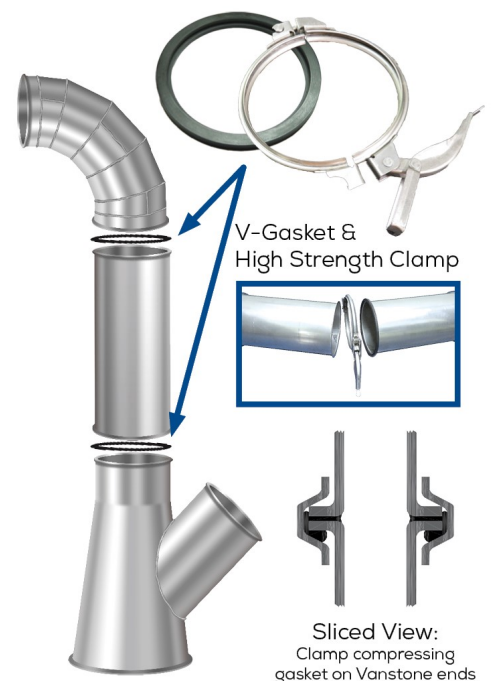

Over the past year, US Duct has enjoyed rapid growth in the number of laboratories using its airtight and 100% leak-free US Tubing product line for fume exhaust. US Tubing is effective in:

**Wet Labs | University Labs | Private Research Facilities | Hospital Chemotherapy Labs | Forensic laboratories.**

Laboratories benefit from the modular, clamp-connect design of US Tubing. The product can be assembled, or reconfigured quickly and easily without welds, screws or tapes. This means cheaper installation and less downtime, plus fewer hazards from welding near gas or oxygen lines, or other combustible materials.

Each piece of US Tubing comes with a Vanstone (flat) edge on each end. A clamp and gasket is used to secure each section together securely and without leaks.

The company makes all ancillary parts including small hoods, hood connections, elbows, branches, roof and wall penetration materials, as well as no loss stack-heads. Additionally, the air handling experts at US Duct will assist with system design.

# The US Tubing Advantage

## Basic Specifications:

- US Tubing is available in sizes from 3" to 18" diameter.
- Materials include galvanized steel as well as 304 or 316 stainless steel.
- Gaskets are available in EPDM, Red Silicone or Viton.

## US Tubing - Your Laser Welded Modular Tubing System

## Ductwork Made Easy

US Tubing is a product of US Duct, Inc. an American manufacturer and is a modular flange and Clamp-Connect ducting systems providing no-leak solutions to oil mist/wet applications, sanitary solutions to food and pharmaceutical industries, and airtight solutions for positive pressure or vacuum conveying applications.

We offer standard products such as 59" straight pipe, adjustable sleeves for fast, in field adjustments (in suitable applications), elbows, branches, reducers, gates, butterfly valves, and all needed accessories. Additionally US Tubing can fabricate special hoods and parts as needed. We ship within 3-5 days and faster shipping is available upon request. All products are available in a wide variety of materials including galvanized, stainless steel, and painted carbon steel, all in various gauges.

The manufacturing facility is staffed with fabricators who are all masters of their trade, and the technical support staff provides customers with experienced, solution based consulting as well as support for design of custom systems and products.
